

ABSTRACT OF THE DISCLOSURE

The invention comprises, a guide cum base, an assembly of six knives and a connection mechanism to form a multi knife cutting device.

The improved features are :

Elimination of knife frame, increasing mechanical advantage,

Positive guiding to the knives minimizing buckling and misalignment,

Design of knife slots to prevent cut pieces from remaining between the knives,

Elimination of vegetable sliding,

Flexible selection of the knives to suit whole potato or French beans which offer different resistance.
